

# Create Your Own Emergency Plan: Fire Evacuation

## What if you need to get out of your home in a hurry?

- If you need to leave right away, don't stop to get things. Make sure you are out and safe.
- Before an emergency occurs in your home, have a plan of exit with at least two ways out.
- Make a plan for a meeting spot that is far enough from your home that you are safe.

## Practice regularly!

Make sure you and your family know what you are going to do.
